Yerrington Public Meeting  
October 5, 2001

BRENNAN PATERSON: Brennan, B-R-E-N-N-A-N,

552318

3 Paterson, with one T.

4 My comment is this: If not here, where?

5 Nevada, especially the Yucca Mountain area, has little  
6 to offer except some mining interests and some wildlife  
7 interests, which is also present in various other points  
8 in Nevada.

9 It would be better to keep it at Yucca Mountain,  
10 the nuclear waste, that is, rather than the places which  
11 it's currently stored, if only for reasons of safety and  
12 security, to have it all centralized.

13 I have no doubt that within the time frame that  
14 the gentlemen mentioned, the 300 years, we'll figure out  
15 something else to do with the waste, neutralize it or  
16 something. I don't know. I'm not a scientist. But for  
17 the time being, it seems the most logical solution.

18 That's all I have to say.
